External Dimensions:

Codes:

The lock is supplied with two factory preset codes.

Master Code: 11 33 55 77

User Code: 22 44

Change both codes after lock has been installed.

All Master Codes 8 digits long.

All User Codes are 4 digits long.

Functions:

Private Function

This is the most common function and used where the same code will be repeatedly used, e.g a pupil in a school or an employee with the same locker in the workplace.

Public Function

The KitLock operates with a single user code. The guest enters a personal four-digit code twice, the second time to confirm the correct code. This locks the lock. The same code is entered once only to open the lock before being erased and ready for the next user. This function is used for short term, multi occupancy applications, e.g a locker in a leisure centre.
