## Pin Tumbler and Interchangeable Core Cabinet Locks & Accessories

### Small Pin Locks

Olympus offers a complete line of small pin cabinet locks in National D4291/D4292 and CCL R1 keyways. Our small pin locks include our patented rekeying technology for easy service in the field. Locks are available off-the-shelf keyed different or keyed alike in a number of stock keyed alike numbers. We also carry a large on-hand stock of KD/MK and KA/MK locks. Our commitment to inventory allows us to ship your custom lock order faster than anyone else in the industry.

**National Keyway**

**CCL Keyway**

### Large Pin Locks

Olympus offers a variety of commercial cabinet locks in Schlage C keyway or less cylinder to accept other Schlage-compatible key-in-knob cylinders. Our Schlage C keyway locks are available off-the-shelf keyed different or keyed alike in a number of stock keyed alike numbers. If required, we will custom key locks to your specifications. Our less cylinder locks will accept any standard key-in-knob cylinders that are Schlage compatible. All of our large pin locks include our patented rekeyability features. These locks may be keyed to match your door system hardware depending on your requirements.

### Small Format IC Core

Olympus has a wide selection of small format IC core cabinet locks that will accept Best, Arrow, Falcon or equivalent SFIC cores. All SFIC locks are sold less core. Olympus Lock also offers a selection of cores in a number of popular keyways.

**B7 Series**  
 Non-IC Best keyway  
 3/4" utility cam  
 lock.

### Schlage Full-Size IC Core

Olympus is the only manufacturer of cabinet locks that accept Schlage-style large format IC cores. We offer door and drawer deadbolt cabinet locks, ratchet lock and cam lock. These cabinet locks will accept both Classic or Primus/Everest LFIC cores, Medeco Key-mark IC cores and Mul-T-Lock LFIC cores.

### Product Applications

Olympus cabinet locks can be used in a variety of applications. Some of the more common applications include: K-12 public schools, colleges and universities, prisons and jails, health care and hospitals, casinos, retail cash drawers, lockers, kiosks, retail showcases, airline

ticket counters, museums, hotels/motels, amusement parks, theaters, restaurants and country clubs, libraries, airports, police stations, fire stations, and churches.

## Specialty Locks

Olympus provides several locks for "specialty" applications. If you need to key into a Medeco or Yale system, use our *931 Series*. Our *CR1125 Series* allows you to key your cabinet locks into your existing Corbin/Russwin systems. These locks will accept Corbin/Russwin IC core cylinders. We also offer our *DCP Series* padlockable cam latch. Great for locker applications, these "cam locks" accept most standard padlocks. Need to key your cabinets into your Sargent system? Our *754/854 Series* door and drawer cabinet locks accept Sargent original cylinders.

## Through-Bolt Plates & Pulls

Olympus offers our unique ETS line of through-bolt mounting plates, templates and cabinet pulls. With today's high use of particleboard, taking locks out for servicing or replacement can mean stripping out the screw holes, making it almost impossible to secure the lock back into place. Our ETS series provides a way of through-bolt mounting the cabinet locks, eliminating the need to screw into the cabinet material. We also offer an optional cabinet pull which can be used in combination with our ETS series products and provides through-bolt mounted cabinet lock and pull together.

## Lock Accessories

Our innovative line of lock accessories provide that final touch to make your application the best it can be. Our internal plastic spacers are used inside the cabinet to bring the face of the lock flush with the face of the cabinet material creating a pleasing overall look to the casework. We also provide a wide assortment of strikes and cams for almost any application as well as pin kits for our National and CCL keyway locks.

## Our commitment to quality and innovation

Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality, keyway compatibility, and value in a manner which sets a new industry standard for excellence.

Our patented rekeyability features have created a new level of expectation for the cabinet lock industry.

Olympus manufactures the broadest assortment of pin tumbler keyways offered by any commercial cabinet lock company. We also provide engineered lock bodies to accept a wide range of third party cylinders. We are your single source for pin tumbler cabinet locks.
