# About this Reference

This Motorcycle Reference has been compiled as carefully as possible, however the history of locks and keys in motorcycles is a complicated one. Ilco believes this information to be accurate and will be of help in identifying which keys are used in which motorcycles. Motorcycle manufacturers have, in the past, used multiple keys, keyways, and code series in a single model year. They have also recycled all of these in different model years. It is impossible to state that specific key blanks will be used in specific models of a motorcycle produced in a specific year.

All possible information about make, model, year and code series has been provided to match up with the required key blanks. Where conflicting information has been found by Ilco, the information has been presented as simply as possible. For example; X57, X58,

X84 & X138 key blanks are listed for Honda motorcycles pre-84. These keys were used in different models in different years. None of these key blanks were used in every model in every year, or even in one model in every year. The most consistent method of identification in this case is the code series. In some cases, the manufacturer has used the same keys and codes in a number of models and those models are listed here to aid in identification.

Motorcycle manufacturers have also made modifications to a key blank, so the old key blank will not work in the newer cycles, but the new key blank will work in both the old and new ones. This listing has substituted the newest and most useful key blanks wherever they may be used.
