About this Reference

The Ilco Motorcycle Key Blank Reference has been researched and compiled as accurately as possible. However, the historical use of locks and keys for motorcycles can be complex and unconventional in comparison to automotive keys.

Motorcycle manufacturers are known to use multiple keys, keyways, and code series in a single model year. They also “recycle” these for different model years. Therefore, it can be difficult to specify a single key blank that will be used for these models and model years.

In this reference, make, model, year and code series are provided to match the required key blanks. Where conflicting information has been found by Ilco, the information has been presented as simply as possible.

For example: X57, X58, X84 & X138 key blanks are listed for pre-84 Honda motorcycles. These keys were used for varying models, varying years. None of these key blanks were

used for every model, every year or even in one model in every year. The most consistent method of identification in this case is the code series. In some cases, the manufacturer has used the same keys and codes for several models. Those models are listed to assist in the identification process.

It is also important to note that some manufacturers have made modifications to original keys. In this case, the old key will not function for new models. However, the new key will work in both (old and new). For these models, we have substituted the new (most useful) key blank.

The body of this reference provides the Manufacturer, Model, Years, and Code Series, Ilco / Silca Key Blank number. In addition, we have included a Comments column. In this column, you will find information on the key (transponder, cloneable), application (steering lock) as well as “trim” suggestions (trim bow 0.250).

Table of Contents

Motorcycles

Manufacturer	Page No.	Manufacturer	Page No.
Aprilia	.3	Kymco	.9
